### DATE OF REPORT:

14 September 2020

Omar is a 26-year-old gentleman, who is a known case of pseudohypoparathyroidism. He is being followed up at king Faisal Specialist hospital since his early childhood, he also has other 2 siblings with the same condition.

He is maintained on calcitriol 1 mcg b.i.d, and he is on calcium carbonate 600 mg b.i.d.

His most recent renal ultrasound in 2018 showed nephrocalcinosis bilaterally. His renal function has been normal. Omar is at risk of hypocalcemia if he has intercurrent stress or if he misses any of his doses. Hypocalcemia can be serious and leads to seizures His calcium level needs to be checked at regular basis as well as during major illnesses.

This report was dictated upon the request of the patient.
